

RS-MS1A Device Requirements

- The RS-MS1A app communicates with the Icom Transceivers over Bluetooth® or the OPC-2350LU data cable.
- Your Android Device must be *USB Host Mode compatible* to communicate with the Icom Transceiver over the OPC-2350LU cable. If your device is not compatible it cannot be upgraded for USB Host Mode capability.
- Not all Android devices that have a USB port that supports the USB Host Mode feature.
- On an Android device that supports USB Host mode, when a USB/OTG (On The Go) cable is plugged in the device will automatically recognize the cable and install drivers. Please check with the device manufacturer for more information.
