

Software Driver Installation in Windows® 10

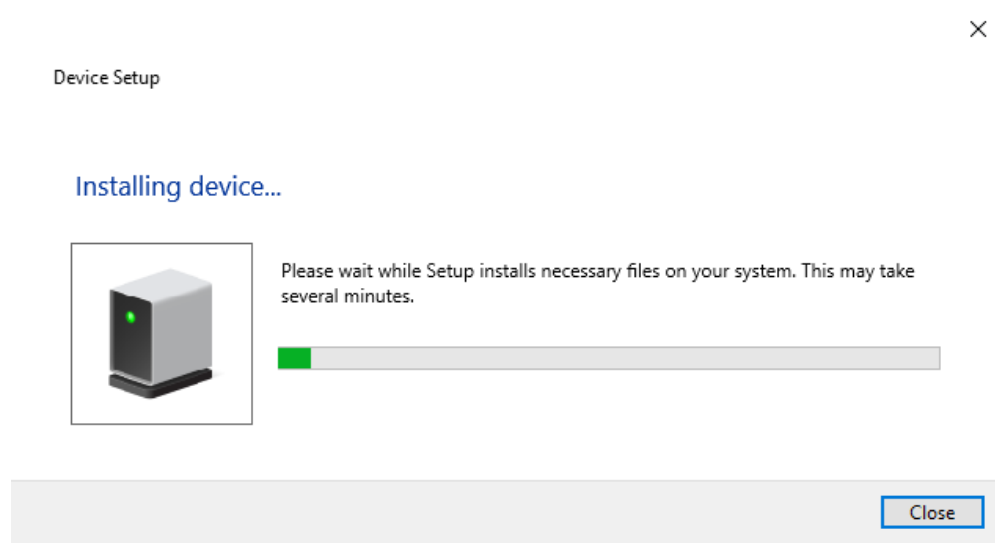

1. Connect your F3400D series radio to your Windows 10 computer with a USB to Micro USB cable.
2. Turn the radio on.
3. On your computer, right-click on the **This PC** icon and select **Manage**.

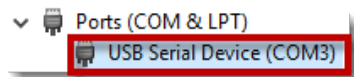

4. Verify that the **ICOM Radio** icon appears under **Other devices**.

Windows 10 will automatically install the USB drivers for the radio.

After the drivers are installed, a valid COM Port number for the radio will appear.

5. Go to **COM Port** and select the Port that appeared in the Device Manager.
